Experience

Ametros Learning, Senior Developer

2024 - Ongoing

Ametros Learning, Full Stack Developer

September 2021 - 2024

- Implemented a feature to generate unique certificates of completion for students.
- Developed a greenfield project to allow instructors and learners to use a ChatGPT-powered tool in their interactions.
- Introduced and implemented unit tests across three frontend code bases.
- Addressed accessibility issues in order to pass an accessibility audit.
- Implemented a Learning Management System grading integration using LTI 1.3.
- Tech stack used: Vue and Ruby-on- Rails.

Hungerhub, Full Stack Developer

July 2019 to July 2021

- Developed and launched a new frontend.
- Developed a feature to allow restaurant partners to print order labels. This feature improved packing efficiency and decreased mislabelled orders.
- Developed internal backend features that improved the efficiency of operations staff.
- Led and mentored a junior developer on frontend projects.
- Tech stack used: Vue and Ruby on Rails.

Flixel, Front End Developer

February 2017 to February 2019

- Developed and launched a new frontend website that consisted of migrating codebases from Angular to Vue.
- Assisted the marketing team by delivering a series of customizable marketing campaign landing pages.
- Tech stack used: Angular, Vue, Node, and Wordpress.

The Pixel Shop, UI Developer

September 2016 to February 2017

- Developed and launched The Glenn Gould School website ahead of schedule by increasing the team members' understanding of Jekyll.
- Developed and maintained CMS websites.
- Tech stack used: Wordpress, Kentico, Javascript, and PHP.
